AUG 29 1990

Honorable William K. Reilly
Administrator
Environmental Protection Agency
401 M Street SW
Washington, DC 20460

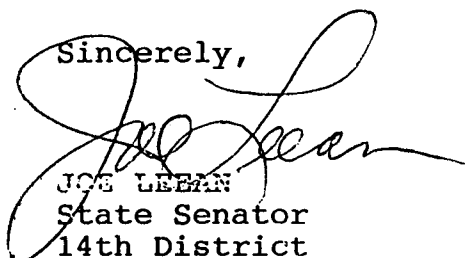

Dear Honorable Reilly,

I have received information regarding a gasoline performance additive known as HiTEC 3000. I understand that the Environmental Protection Agency is considering permitting the use of this additive in this country.

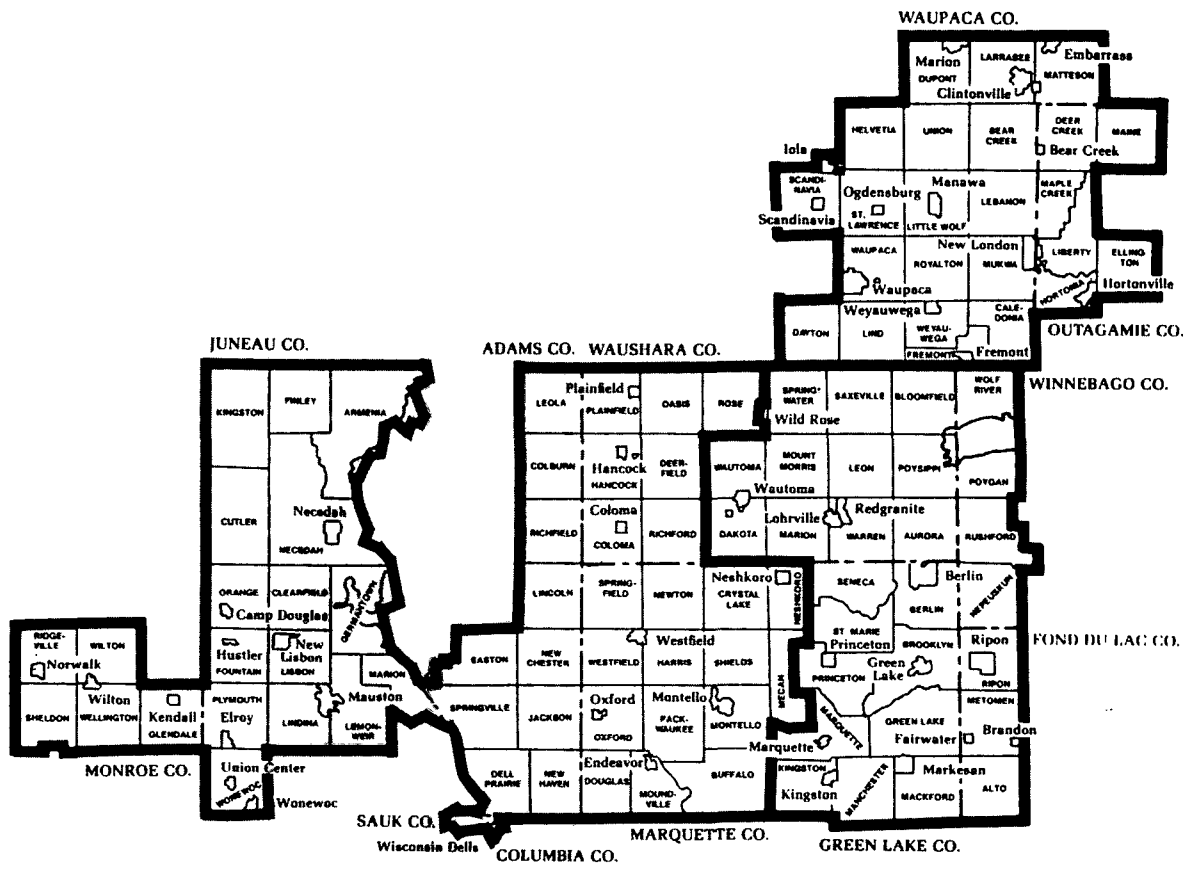

Certainly air quality is of concern to everyone. The information I have on this additive seems to indicate significant potential for reducing pollutants as well as saving crude oil.

I hope the Environmental Protection Agency can give prompt consideration to this additive.

Sincerely,

JOE LEEAN
State Senator
14th District
